## DIVISION OF PUBLICATIONS—CIRCULAR 2.

[Revised to October 15, 1909.]

JOS. A. ARNOLD, *Editor and Chief.*

### PUBLICATIONS FOR FREE DISTRIBUTION.

Copies of the publications in the accompanying list will be sent free, so long as the editions permit, on application to the Secretary of Agriculture, Washington, D. C. Applications for Farmers' Bulletins may also be sent to Senators, Representatives, and Delegates in Congress, each of whom has a quota of several thousand copies for distribution among constituents. Applications from residents in foreign countries should be sent to the Superintendent of Documents, Government Printing Office, Washington, D. C., price per copy, 6 cents, including postage.

The Farmers' Bulletins and Circulars of Information issued by the U. S. Department of Agriculture are printed in large editions and are for free distribution, the object being to supply farmers and others interested in agriculture and kindred subjects with condensed and practical information. It is expected, however, that applicants will ask for only such publications as are likely to be of special interest to them, and not with a view to getting complete sets, which might embrace many bulletins and circulars of no use to them, but which would be of great value to some one else. If applicants will bear this fact in mind, they will greatly aid the Department in its efforts to make the widest and at the same time the most useful distribution of its publications.
